Mid-Canada Mod Center  
2450 Derry Road East, Hangar #9  
Mississauga, ON L5S 1B2

**Attention:** Mr. Bill Arsenault, President

**Subject:** Program Validation Inspection Report

**Your reference number for this activity is:** ATS-16-17-00062416

Dear Sir:

A Program Validation Inspection (PVI) of Mid-Canada Mod Center was carried out by Transport Canada on February 5 & 6, 2018. As a certificate holder offering Manufacturing and Maintenance services under CAR 561 & 573 of the Canadian Aviation Regulations (CARs), Mid-Canada Mod Center is required to comply with these regulatory requirements on an on-going basis. To that end, the purpose of the PVI was to verify that Mid-Canada Mod Center was in compliance and it has the systems in place to ensure on-going compliance with regulatory requirements.

The scope included an evaluation of the following area(s) of Mid-Canada Mod Center operation:

- The quality assurance program
- The EASA MAG

The PVI determined that all areas of enterprise operation were in compliance with the regulatory requirements.

Your cooperation during the surveillance activity was appreciated.

Yours truly,
