

SUBJECT: Infection and Disease Control Policy	LAST REVISED: 2020-05-12	POLICY NUMBER: HSP-013
SCOPE: All Classifications of Employees	SECTION: Health and Safety Manual	

Employee Immunizations

To protect both employees and clients, it is recommended that employees have (some/all) of the following immunizations:

- Measles, mumps and rubella (MMR) vaccine (two doses) or documentation of immunity
- Varicella vaccine (two doses) or documentation of immunity
- Hepatitis B vaccine (two doses) or documentation of immunity
- Tetanus vaccine (every 10 years)
- Acellular pertussis vaccine (one dose)

Additional Measures

To protect both employees and clients, Mid-Canada Mod Center may introduce additional measures that include but are not limited to:

- Infectious disease specific procedures
- Adjusted work schedules or change in hours of operation
- Remote work practices
- Return to work following a Global Pandemic

Additional Policies, Procedures, and Recommendations

The following additional policies and procedures shall be in place to control the spread of infectious diseases:

- HSP-014 Hand Washing Policy
- HSP-015 General Housekeeping Policy and Procedures
- HSP-016 Travel Policy (Global Pandemic)
- HSP-017 COVID-19 Specific Policy (Global Pandemic)
- HSP-018 Mental Health and Anxiety (Global Pandemic)

Acknowledgement and Agreement

I acknowledge that I have read and understand the Infection and Disease Control Policy of Mid-Canada Mod Center. I agree to adhere to this policy and will ensure that others under my direction also adhere to the terms of this policy.
